Scoring table:

BLOSUM62 Gapop 10.0 , Gapext 0.5

Searched:

Total number of hits satisfying chosen parameters:

112892 seqs, 41476328 residues

Minimum DB seq length: 0
Maximum DB seq length: 2000000000

Post-processing: Minimum Match 0% Maximum Match 100% Listing first 45 summaries

SwissProt_40:*

Database :

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

-!- COFACTOR: PROBABLY BINDS A 2FE-2S GROUP AND AN IRON ATOM.
-!- PATHWAY: UPPER NAPHHALENE CATABOLIC PATHWAY WHICH INVOLVES
CONVERSION OF NAPTHALENE TO SALICYLATE, AND CATABOLISM OF
DIBENZOTHIOPHENE (DBT) AND PHEMANTHRENE. CONVERTS PHENANTHRENE TO
1-HYDROXY-2-NAPTHOIC ACID AND THE METABOLISM OF DBT IS LIMITED TO
OXIDATION OF THE AROMATIC RING.
-!- SUBUNIT: NAPHTHALENE DIOXYGENASE (NDO) MULTICOMPONENT ENZYME
SYSTEM IS COMPOSED OF AN ELECTRON TRANSFER COMPONENT IS COMPOSED
OF FERREDOXIN REDUCTASE (NDOR) AND FERREDOXIN (NDOA), AND ISP IS
COMPOSED OF AN HEXAMER OF THREE LARGE ALPHA SUBUNITS (NDOB) AND
THREE SMALL BETA SUBUNITS (NDC).
-!- SIMILARITY: BELONGS TO THE BACTERIAL RING-HYDROXYLATING
DIOXYGENASE ALPHA SUBUNIT FAMILY.
                                                                                                                                      METAL

-:- COFACTOR: PROBABLY BINDS A 2FE-2S GROUP AND AN IRON ATOM.

-:- PATHWAY: UPPER NAPTHALENE CATABOLIC PATHWAY WHICH INVOLVES CONVERSION OF NAPTHALENE TO SALICYLATE, AND CATABOLISM OF DIBENZOTHIOPHENE (DBT) AND PHENANTHRENE. CONVERTS PHENANTHRENE TO 1-HYDROXY-2-NAPTHOIC ACID AND THE METABOLISM OF DBT IS LIMITED TO OXIDATION OF THE AROMATIC RING.

-:- SUBUNIT: NAPHTHALENE DIOXYGENASE (NDO) MULTICOMPONENT ENZYME SYSTEM IS COMPOSED OF AN ELECTRON TRANSFER COMPONENT AND AN IRON SULFUR PROTEIN (ISP). THE ELECTRON TRANSFER COMPONENT IS COMPOSED OF FERREDOXIN REDUCTASE (NDOR) AND FERREDOXIN (NDOA), AND ISP IS OTOMPOSED OF A LARGE ALPHA SUBUNIT (NDOB) AND A SMALL BETA SUBUNIT
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   METAL

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          SUBUNIT: Heterohexamer consisting of three BphA subunits and temper subunits. A ferredoxin (BphF) and a ferredoxin reductase (BphG) must be present to obtain activity (By similarity).

SIMILARITY: BELONGS TO THE BACTERIAL RING-HYDROXYLATING
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           first step.
SUBUNIT: Heterohexamer
